EDUCATION

Humber College

Ontario Graduate Certificate, Web Development

Toronto, ON

Sep. 2020 – August 2021

McMaster University

Honours Bachelor of Arts in Anthropology, Business Studies Certificate

Hamilton, ON

Sep. 2013 – Dec 2019

EXPERIENCE

Software Engineer

Sep 2021 – Present

Xello

Toronto, ON

- Created the structure for Xello's design system in 3 months working closely with stakeholders and team members to improve design and development efficiency
- Using Lit, TypeScript, and Sass created an internal component library of 12+ components being used and contributed to by 4 different product teams
- Created and implemented accessibility guidelines for the Xello design system component library including pre-commit accessibility linting to improve accessibility standards
- Collaborated with DevOps Engineers to create a custom CI/CD pipeline for the Xello Design System
- Wrote an internal script that retrieves design assets from a Figma file, and uploads them directly to the project GitHub repository using the Figma and GitHub API's
- Developed a process to add, update, and use icons and illustration assets in product applications, improving UI consistency and ease of use for developers
- Automated the creation of a global style file using Sass and design tokens to improve UI consistency between Xello's applications
- Using C#, SQL, and ASP.NET MVC, developed tooling to support needs of content stakeholders, connecting them with source data and providing the ability to create, edit, and delete data
- Created 4+ Github PR read-me template files to improve development and review standards for 2 projects

Web Developer

Jan. 2021 – Mar. 2021

Noel Semple Campaign

Toronto, ON

- Collaborated as a team of 2 developers to develop a campaign website using the Nationbuilder content management system
- Developed a political campaign website from inception to delivery on a strict deadline for campaign launch

PROJECTS

JustCook | HTML5, CSS, JavaScript, React, Express, Redux, Git

March 2021 – May 2021

- Developed a full-stack web application with a team of 4 other developers using a React frontend
- Connected to the Spoonacular API to retrieve recipe data
- Implemented a shopping cart with state management using Redux

Galekxy Media Youtube

May 2020 – Present

- A YouTube Channel to explore my interests in web development, technology, and to help other programmers learn beginner web development content
- Published first video, a tutorial on how to host a static React application using GitHub pages has gained over 7200 views, 300 likes, and 60 comments

TECHNICAL SKILLS

Languages: HTML/CSS, JavaScript, C#, SQL, TypeScript, Sass

Frameworks: Lit, ASP.Net, React

Developer Tools: Git, VS Code, Visual Studio, SQL Server Management Studio
