Technical Skills

Languages: C#, TypeScript, JavaScript, SQL, HTML, CSS, Sass
Backend & Frameworks: ASP.NET (.NET 8), RESTful API development
Databases: PostgreSQL, SQL Server; familiarity with MongoDB
Cloud & DevOps : AWS (S3, EC2), Azure deployment pipelines, CI/CD workflows
Frontend : React, Lit, Razor, component-driven UI development
Testing & QualityxUnit, Jest
Tools: Git, Visual Studio, VS Code, Slack webhooks, GitHub Actions, GenAI (ChatGPT, Claude, Copilot)

Experience

Software Engineer – Xello Sep 2021 – Present
Toronto, ON - Remote

- Designed and developed backend features and RESTful APIs using C# and ASP.NET (.NET 8), supporting educator workflows including student application tracking and administrative tools
- Built data integration and automation pipelines using C#, ASP.NET, and SQL, reducing the average deployment + data update turnaround time by 2 hours
- Implemented automated alerting system using Slack webhooks to notify teams of data integration failures, improving incident response times from days to minutes
- Collaborated closely with product managers, designers, and engineering peers to define requirements, scope features, and deliver software through multiple release cycles
- Developed and maintained a shared internal component library in TypeScript (Lit) adopted by ten product teams, improving UI consistency and reducing duplicated implementation work
- Led documentation, training workshops, and onboarding sessions, improving cross-team understanding of internal systems and decreasing recurring support questions
- Worked within cloud-hosted deployment environments (Azure + AWS S3/EC2) and CI/CD pipelines to support application releases and production maintenance
- Created and enforced accessibility standards and pre-commit linting workflows to improve code quality and consistency across applications
- Modernized integration test suite and improved testability through ASP.NET test host and DI

Projects

Fantasy Puck Lab | *Next.JS, Tailwind, TypeScript, Git, Netlify, Google Analytics* July 2025 – Present

- Built and deployed a full-stack web application used by active fantasy league participants
- Implemented client-side contract calculation logic and image export functionality for faster team management decisions
- Implemented Google Analytics to monitor engagement, reaching 100 active users since launch

JustCook | *HTML5, CSS, JavaScript, React, Express, Redux, Git* March 2021 – May 2021

- Developed a full-stack web application with a team of 4 other developers using a React frontend
- Connected to the Spoonacular API to retrieve recipe data
- Implemented a shopping cart with state management using Redux

Education

WatSPEED at the University of Waterloo Remote
Back-End Development Certificate *Sep. 2025 – Present*

Humber College Toronto, ON
Ontario Graduate Certificate, Web Development *Sep. 2020 – August 2021*

McMaster University Hamilton, ON
Honours Bachelor of Arts in Anthropology, Business Studies Certificate *Sep. 2013 – Dec 2019*
