Professional Summary

Full-Stack Engineer with 5+ years of experience delivering scalable, high-quality software solutions in EdTech. Expertise in C#/.NET ecosystems, with a proven track record of owning full product lifecycles, debugging complex issues, proactively addressing technical debt, and championing craftsmanship to build resilient systems.

Experience

Software Engineer July 2021 – Present
Xello *Toronto, ON - Remote*

- Built and maintained an internal CMS in C#, .NET 8, and Razor, owning the full lifecycle of backend and dynamic frontend workflows
- Architected scalable, performant data integration pipelines with ASP.NET and SQL, cutting deployment effort by 2 hours and improving reliability
- Led a 2-month initiative to implement resilient image upload functionality into Octopus Deploy CI/CD pipelines, saving 1 hour per upload and reducing content lead time by up to a week
- Developed a shared UI component library and design system in Lit/TypeScript/Sass for 5 product teams, boosting consistency and developer efficiency
- Engineered a JavaScript Figma→GitHub asset pipeline to simplify asset management, empowering designers to deploy UI assets independently and improve cross-team handoff speed
- Designed and implemented scalable REST APIs in C#, .NET 8, and SQL, enabling educators to seamlessly add applications to student trackers and streamlining administrative workflows

Projects

Fantasy Puck Lab | *HTML5, CSS, JavaScript, Git, Netlify, Google Analytics* July 2025 – Present

- Built a responsive web app to help fantasy hockey participants optimize roster and contract decisions
- Developed interactive skater and goalie contract calculators using DOM manipulation and event handling
- Implemented an image download feature utilizing html2canvas that turns calculated contracts into image files for efficient team management, reducing calculating time by up to 5 minutes per contract
- Implemented Google Analytics to monitor engagement, reaching 49 active users since launch

JustCook | *HTML5, CSS, JavaScript, React, Express, Redux, Git* March 2021 – May 2021

- Developed a full-stack web application with a team of 4 other developers using a React frontend
- Connected to the Spoonacular API to retrieve recipe data
- Implemented a shopping cart with state management using Redux

Education

Humber College Toronto, ON
Ontario Graduate Certificate, Web Development *Sep. 2020 – August 2021*

McMaster University Hamilton, ON
Honours Bachelor of Arts in Anthropology, Business Studies Certificate *Sep. 2013 – Dec 2019*

Licenses & Certifications

Back-End Frameworks And Architecture Jan. 2026
WatSPEED at the University of Waterloo

Technical Skills

Languages & Querying: HTML, CSS, Sass, JavaScript, TypeScript, C#, SQL, PostgreSQL, Razor
Frameworks & Libraries: .NET 8 (ASP.NET Core), React, Lit, Htmx
Testing & Tooling: xUnit, Jest
Other Technologies: Node.js, Slack Webhooks, REST APIs
Developer Tools: Git, VS Code, Visual Studio, SQL Server Management Studio, GenAI (ChatGPT/Codex, Claude, Copilot)
